

PROFESSIONAL CUTLERY

C A T A L O G

OVER 80 YEARS OF UNCOMPROMISING QUALITY

WORLDWIDE CUTLERY LEADER

Mundial Inc. is among the leading North American brands of cutlery and kitchen accessories sold to the restaurant and institutional markets. We are also a leader in the retail and industrial scissors and shears categories. With a growing business in retail cutlery through gourmet, specialty and department stores, Mundial products are squarely positioned as high quality and upscale, but with a distinct value advantage. Thanks to manufacturing efficiencies and more competitive costs of raw materials (Brazil is one of the largest producers of steel in the world.) Mundial can position its top quality products at extremely affordable prices. Mundial combines Old World craftsman-ship with modern technology to produce a broad selection of products unmatched in the world for strength, durability, beauty, comfort and value.

WHEN IS A KNIFE MORE THAN SIMPLY A TOOL?

When its design reflects the perfect marriage of form and function – delivering maximum comfort, balance and performance. When it is made from the best steel alloy to ensure precision cutting and a lifetime of durability. When it is fully forged for greater strength, resilience and lasting sharpness. And when that same focus on excellence in design and performance is applied across the board to a full range of knives and accessories, each one ideally suited to its culinary task. In other words, when it is MUNDIAL.

SAFEGUARDS ARE THE SIGN OF A MARKET LEADER

SANITIZED®ANTIMICROBIAL PROTECTION—GUARANTEES SAFETY FOR YOUR CUSTOMERS

Many Mundial knives and accessories have Sanitized Antimicrobial Protection, the safe treatment of the polypropylene handles designed to guard against the growth of bacteria, yeast, mold and fungi.

- Sanitized additives are incorporated into the knife handle during the manufacturing process
- Decreases the risk of unpleasant odors while improving the hygiene of the knives
- A highly respected and widely used technology tested in accordance with international standards
- Thorough cleaning and maintenance still required on all products treated with Sanitized additives

NSF CERTIFICATION—DEMONSTRATES OUR COMMITMENT TO QUALITY PRODUCTS

Mundial knives are NSF approved, meeting all food service industry standards for sanitation.

TRACKABLE KNIVES—ENSURES QUALITY AND CONTROL THROUGHOUT PRODUCT LIFE

A unique tracking number is stamped on the blade of many Mundial knives.

- Enables knives to be identified throughout their useful life
- Facilitates quality assurance and monitoring
- Provides controls for scheduled sterilizations and resharpening
- Determines useful life to facilitate re-ordering – minimizes inventory while maximizing productivity

5600 SERIES

MUNDIAL 5600 SERIES KNIVES AND ACCESSORIES

Mundial Sanitized® Antimicrobial Protection, which is the safe treatment of the polypropylene handles to guard against the growth of bacteria, yeast, mold and fungi. Each product is ergonomically designed and crafted to provide a secure non-slip grip even when wet. Mundial carefully matches each blade and handle so that they are perfectly balanced. A good grip and perfect balance minimize fatigue and make even large-scale food preparation fast, easy and precise.

MARKS SERIES

MARKS BY MUNDIAL CUTLERY IS MADE FROM HIGH-CARBON JAPANESE STEEL,

Ensuring greater durability and the highest edge retention under the most demanding conditions. Ergonomic non-slip grip handles assure extreme comfort for long term use. All of the handles are double injection with a soft outer layer for comfort and hard PP plastic inner for control and safety.

Marks by Mundial offers an entire product line to handle all of your food preparation needs. The blades and handles are matched for perfect balance, which minimizes fatigue. NSF approved, these knives are treated with sanitized antimicrobial protection, which protects the knife handles from bacterial growth.

5100 SERIES FULLY FORGED

DESIGNED AND INDEPENDENTLY VERIFIED TO BE AMONG THE BEST IN THE WORLD

How do Mundial knives compare to other premium cutlery? In addition to our own extensive quality control procedures, Mundial regularly submits its products to an international independent testing facility. Its standardized testing methodologies continue to show that Mundial knives are among the best in the world.

THE VALUE OF A FULLY FORGED KNIFE

Mundial fully forged knives are manufactured in a process that combines innovative technology with Old World tradition and expertise. In the forging process, steel is heated to an extremely high temperature, set into a die and hammered into the shape of the basic blade. Following a process of heating and cooling, the forged blade is ground to create a full taper to the cutting edge. The result is a stronger, thicker, more resilient blade that flares smoothly at the heel to blend into the shape of the handle. Cutlery that is fully forged offers an array of key benefits including greater tensile strength, increased durability, lasting sharpness and better balance and control.

HANDLE

Designed to securely hold the full tang, one of the most authentic parts of a forged knife, our handles are ergonomically designed and crafted for comfort and long life.

BOLSTER

The main feature of any truly forged knife, it ensures balance and protection.

STEEL DEVELOPMENT

Mundial Chrome Molybdenum stainless steel is processed to provide the best combination of edge retention and sharpening ease.

BLADE DESIGN

Mundial computer-aided design process creates the perfect shape for chopping, dicing and slicing.

EDGE

Every Mundial knife is hand sharpened and individually tested for ultimate performance.

BLADE GRINDING

Computerized grinding and polishing machines ensure precise tapering from tip to bolster.

TURNER SERIES

MUNDIAL TURNERS AND ACCESSORIES

Mundial Sanitized® Antimicrobial Protection, which is the safe treatment of the polypropylene handles to guard against the growth of bacteria, yeast, mold and fungi. Wood handles are made with food-safe wood material. Rivets are designed to last for years without coming loose. Each product is injection-molded and ergonomically designed to provide a secure non-slip grip.
